About This Content

The FPV Air 2 Track Builder enables you to quickly and easily get your track designs into the sim. Get practicing custom layouts as fast as possible!

With a unique and intuitive interface design, dropping in gates won't need to distract from time spent flying.

- Build and practice race event tracks before competing in real-life races
- Keep your skill dynamic by practicing an unlimited number of new lines, as many as you care to build!
- Intuitive user interface for rapid track construction
- Online track sharing

When you host a custom built track online, others with the DLC will be able to download that track from you, so you can freely and easily share, fly and modify each other's tracks.

This is one of the most relaxing games I have ever played. Beautiful graphics, beautiful music and really nice puzzles with the difficulty level progressing smoothly.. Amazing game, that's it! 10/10. This is visual novel with permadeath. Every time I try to load my save game - i receive Ren'Py error screen.. Very limited and oversimplified tower defense game. Not worth the \$10 price tag imo. After the first ten levels gameplay just continues on the same. No innovation or real fun to be had here move on.. What a plain Paint. you Can't seem to use your own paint program due to mirroring in the coding . The Dome does not spin on top and I cannot get launch bar lowered. Flight characteristics are backwards on the ailerons, there are more my friends have discovered. It seems like this plane was quickly put out with attention to details ignored. I wish I had not wasted my money on this aircraft.. This game is just so-so. The real downfall in this is that I was expecting the kind of game where you get more and more spells as it goes on but instead you are given one at a time so each room is very straight forward in how they are completed and more relies on annoyingly precise platforming rather than any sort of clever thinking with how your magic works. Around the half way point it felt more worth it to stop playing rather than continue. If you enjoy tough platforming games then this could be for you but I personally find that it gets difficult later on for the wrong reasons.

This isn't that bad of a game, but it really isn't all that great either.. This game is bad. It's ugly, it's loud, it's stupid, it's boring and it's ultimately pointless.. I'm a huge hidden object games fan and compared to the other titles I have in my library, this is not one of my favourites.

The storyline is okayish - the developers went with a more realistic storyline than the normal fantasy storyline one would associate with this genre. The story however did not really grab my attention, which is possibly due to the voice acting of the characters. I found myself switching off the sound and reading the subtitles rather than playing with the sound on.

The game is also fairly short and the puzzles are relatively easy for the genre. I did find myself stuck on one or two puzzles but this was more due to the instructions not being very clear rather than the difficulty of the puzzles.

All in all it's definitely not one of the worst HOG out there - it just isn't one of the best either. It's average. If you are a hardcore HOG fan, this might not be the best fit for you but if you're new to HOG, it's a good introduction to the genre.

(I'm only not recommending this game because there isn't an 'average' option on Steam and like I said at the beginning of this review, it's not one of my favourites in my library.). cant progress without paying.

Buggy mess.. I Love this DLC! I take Metra alot and could not wait for this. This is a must have for this game. I also took a ride on the real thing and it is the same!. I sadly took the 7mm Regent out of my inventory to try these weapons out.

Drilling rifle.... BEAST! Hits like a bus, 16GA buckshot for a few ducks, the 9mm rifle cleared a few nice red deer, then hit a bear in the head at about 60 metres with a 16GA slug, all one shot kills!

The bolt action, very accurate at long range, took a few red deer, including a headshot at 200+metres, very nice.

Sadly I think the good faithful 7mm Regent has retired to my gun cabinet.

Great DLC, thank you, very good value for money.. As EARLY ACCESS, this game is pretty bad, to much glitches that make your ship impossible to control, other glitches that make you do not move at all and is just fun without frame rate drops or with other keys that you can use. The graphics are not very good and is better to the developers finish the game and make it faster and fix all glitches that happens in every match.

The unfinished version gets 3 out of 10. Where Do I Even Find This Thing?!. Must have for 3d devs in AGK. Incredibly underrated.. A very nice game at 1\$:D. One of my favorite games, hands down. Nearly 400 hours and still rising every so often. If you like having the ability to customize your ships in Galactic Civ II or something along those lines then this is the next step up. There (were) also some excellent mods, at least two total conversion mods that added tons of weapons and the like but unfortunately those have become outdated. I hear, however, that the modding is easy (relatively) so that is another plus if you like messing around with your games.

Unfortunately, it does have some problems though. I am not 100% certain the weapons are all balanced and the diplomacy system is... lacking.. to say the least, but I still very much enjoy playing and still do.

If you liked this game, you should check out the sequel they are working on!. An excellent part 2.

It's starting to pick up some speed. I'm looking forward to part 3.

Hopefully season 2 will fully focus on superhero hijinks.

. The emotional content can be very taxing at times the plot twists and narrative all point to a higher intelligence.

I guess when i comes to teachers its a learning curvature.....7/10
